

MUSEOGRAPHY TOUR « Découvertes »

Edmond Fallot

LA MOUTARDERIE

LET MUSTARD TICKLE YOUR CURIOSITY

«La Moutarderie Fallot», first French museum dedicated to mustard, invites you to discover this legendary condiment through an introductory tour.

Tucked away in a inner courtyard, just a few steps from the Hospices de Beaune, « La Moutarderie Fallot » is actually the last mustard mill to prepare mustard in compliance with recipes passed down from generation to generation, and to grind the seeds using stone wheels, thus giving the paste its fully rounded gustatory qualities.

In the course of an entertaining and interactive tour, set in a timeless and old factory atmosphere that is completely unique, «La Moutarderie Fallot» takes the visitor through the centuries to recall him the (often forgotten) art and traditions relating to mustard and its history.

Ancient tools and equipment, carefully preserved and presented using harmonious lighting and sound effects, propel the visitor into the amazing world of mustard, where a great number of manufacturing secrets are unveiled to him.

With all the senses awakened, the visitor can thus get acquainted with new and tangy pleasures ranging from the making to the tasting of mustards, and even test his knowledge !

USEFUL INFORMATION

«DÉCOUVERTES» TOUR

Individual visits are guided and take place at fixed times for a maximum of 20 persons per tour.

Available languages : 

PRICE OF TOUR :
