JOURNEY OF DISCOVERY

Edmond Fallot

LA MOUTARDERIE

COME AND DISCOVER THE NEW WORLD OF THE MUSTARD IN BURGUNDY

Having enjoyed a great deal of success with its museum area, La Moutarderie Fallot has decided to open the doors of its current production site to the public !

Using a revolutionary staging method, together with highly sophisticated visual, sound and sensory media, at last you will be able to discover for yourself all the steps involved in transforming the wild mustard seed: from the storage silo right up to packaging the end product.

While La Moutarderie Fallot has been able to preserve its traditional and ancestral manufacturing methods, which involve grinding the seeds with a millstone, it is with pride that we now invite you to come and discover totally new experiences and sensations at a venue which truly befits the 21st century !

So come and enjoy a novel experience which is one of a kind by entering the new world of the mustard in Burgundy and, if you have the inclination, become a mustard-maker in the blink of an eye !
